DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group 1 in Paper No. 9, filed 7/22/02, is acknowledged. Claims 1-19 are pending in the instant application. Claims 6-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim.

Information Disclosure Statement

Receipt is acknowledged of an information disclosure statement, filed 4/09/01 as Paper No. 4. The corresponding PTO Form 1449 has been signed, initialed and mailed with this action.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because it improperly claims benefit to a provisional application under 35 U.S.C. 120. A non-provisional application cannot be a continuation or continuation-in-part of a provisional application. Instead, the benefit of the provisional application must be claimed under 35 U.S.C. 119(e).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1636

Claims 1-5, 11-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Each of the claimed methods is vague and indefinite in that there is no stated outcome for the methods in the preamble of the claims. The preamble merely states the words "A method" or "The method", followed by methods steps. This makes it impossible for one to determine whether one has successfully performed the claimed method as there is no stated end result. It would be remedial to amend the claim language to clearly state the intended outcome of the claimed method.

Claims 1, 12, 14, 17 each recite a first vector followed by a step of culturing a cell transformed with the first vector in order to produce a second vector. The second vector can then be selected from a group of vectors comprising a third and fourth vector. The presence of the terms "third vector" or "fourth vector" imply that the third and fourth vectors are somehow distinct from the second vector. In fact, upon reading the specification it appears that the second vector is necessarily either the third or fourth vector. It would be remedial to amend the claim language by deleting the terms "third" and "fourth" in referring to the different members of the Markush group of product vectors.

Conclusion

No claims are allowed.
